## SUMMARY

Computer Science undergraduate at M.S. Ramaiah University of Applied Sciences with hands-on experience across full-stack web development (MERN), cybersecurity, cryptography, and data mining. Skilled in building end-to-end projects spanning machine learning-driven analysis tools, deep learning architectures, applied cryptography, compiler design, and embedded systems. Completed a cybersecurity internship with CODEC Technologies in partnership with Google, and consistently focused on translating theoretical concepts into working, real-world implementations.

## EDUCATION

**M.S. Ramaiah University of Applied Sciences** *2023 – 2027*
*B.Tech in Computer Science and Engineering | CGPA: 7.05*

**Vijaya Bifurcated PU College** *2021 – 2023*
*Pre-University Education (PCMB) | Percentage: 80.17%*

**St. Michael's English School** *2019 – 2020*
*10th - SSLC | Percentage: 72.64%*

## TECHNICAL SKILLS

**Languages Known:** Java, Python, HTML5, CSS, JS, Express, React.js, Node.js

**Security:** Cybersecurity Fundamentals, Cryptography

## PROJECTS

**Resume Skill Graph Analyzer** *2026*

- Built a resume analysis tool using data mining classification techniques trained and evaluated on a real-world dataset to extract and map candidate skills.

**Aparnabindu: A Hybrid ConvNeXt-Transformer Framework for Global-Local Structural Analysis of Kolam Patterns**

- Designed a hybrid deep learning architecture combining ConvNeXt and Transformer models to analyze global and local structural patterns in Kolam art.

**RSA Public Key Cryptography Implementation** *2026*

- Implemented RSA public key cryptography to enable secure communication between two parties (Alice and Bob), covering key generation, encryption, and decryption.

**Student Attendance Marker Using Arduino Uno** *2026*

- Built an automated student attendance marking system using Arduino Uno for real-time attendance capture.

## CERTIFICATIONS

- Cybersecurity Course and Internship, CODEC Technologies (in partnership with Google) – Unpaid Internship
